The Sonnenstrahl Schlafplatz cottage bed

If you're looking for the perfect bed for your child that will seamlessly fit into the design of their room while also meeting their needs, our range of children's beds, including the Sonnenstrahl Schlafplatz model, is just for you. Our children's beds are designed to easily match the style of the bedroom and your child's taste.

The Sonnenstrahl Schlafplatz cottage bed stands out from others with its functionality and unique design. Made from a combination of high-quality pine wood and durable MDF boards, and coated with safe, eco-friendly water-based varnish, it ensures safety and durability for years to come. The distinctive cottage design not only stimulates children's imagination, allowing for a creative approach to space through painting, hanging curtains, or plush toys, but also adapts to the changing needs of the child, becoming a place for rest, play, and learning. Additionally, the Sonnenstrahl Schlafplatz cottage bed is equipped with a practical drawer, which effectively solves the problem of storing bedding, leaving space for a pillow, duvet, blanket, and favorite plush toys.

Comfortable children's bed with drawer The excellent appearance of the bed, as already mentioned, is one of its advantages. This model stands out with comfort and provides children with a healthy and peaceful sleep. The mattress space is 80 x 160 cm, which is a standard size for children's beds. The furniture is equipped with a sturdy but flexible slatted base, which helps to maintain the lifespan of the mattress and, above all, supports its work. The bed also has a small headrest, providing comfort especially when the child wants to comfortably read a book or watch cartoons on a tablet.

Space for a spacious drawer is planned under the base. It is useful for storing extra bedding or a blanket for the child, or simply for the child's toys. The drawers can be removed to make the bed look lighter, standing on slender legs. The lack of drawers also makes it easier to clean under the furniture, which may be important information for parents of small allergy sufferers and asthmatics.

White bed 80 x 160 - safe and durable What is usually most important for parents of young children is their safety. Our drawer bed was created with the youngest in mind and is safe for them. A high barrier protects part of the mattress, preventing the child from falling out of bed while tossing and turning during sleep. When the toddler grows up, the barrier can be easily removed. Removing the railing and assembling the entire furniture will be easily handled by any adult, even one without experience in DIY.

The Ellie cottage bed is made of the highest quality wood, which has also been painted with several layers of non-toxic, environmentally friendly water-based paint, completely neutral for the child's respiratory system. The metal elements used to build the furniture are safe mechanisms. A parent can sleep peacefully after laying the toddler to sleep in the Ellie cottage bed!

Looking for a bed for years? Choose the Ellie cottage bed! The white children's bed with a drawer Ellie receives positive feedback from our customers regarding its solid construction and durability. Despite its airy structure, the furniture is quite heavy, so the child will not be able to tip it over. The strong wood used for production and high-quality paints are characterized by exceptional resistance to mechanical damage. Our 80 x 160 bed still looks great even after several years, when it passes into the hands of younger siblings.

It is worth mentioning the universal character of the bed. White color fits perfectly into the arrangement of girls' and boys' rooms as well as all other colors. This means that when you want to change the arrangement of your child's room, you won't have to change the bed - it fits perfectly into any design!

White cottage bed for children's room in Scandinavian style Our 80 x 160 bed is a great choice primarily for minimalist and cozy arrangements in Scandinavian style. The simple, but not banal shape of the furniture immediately catches the eye and quickly becomes the center of attention in any arrangement. The bed looks elegant and original, and most importantly, it is in no way tacky. This is a great choice for those who want to create a child-friendly room that won't overwhelm the child with loud colors and excessive decorations.

This charming, white bed also fits traditionally arranged pastel children's rooms and will also perfectly match the beiges and browns dominant in traditional arrangements, becoming a modern accent. Its visually light construction will not overwhelm a small children's room and will not become invisible in a large room. The bed will certainly delight your child and become the main argument for him to choose a beautiful and unusual piece of furniture, the Ellie cottage bed is sure to be a bull's-eye!
